cramer-check: sample scorecard

Illustration of the skill's output. Company: Urban Company (NSE: URBANCO). Data as of late Oct 2026 results (Q2 FY27); not a current price. Unofficial student project: not affiliated with or endorsed by Jim Cramer or CNBC. Not investment advice.

Verdict: not eligible for a portfolio slot now (watchlist). Real growth, but it fails the Rule of 40 as reported, is diluting, and is priced for perfection.

Rule (book framework)	Result	Number behind it	Confidence
Gate 1: concept company without earnings	**Borderline**	Loss-maker, so it must pass the Rule of 40. Not a deep cyclical.	Likely
Rule of 40 (reported)	**Fail**	Revenue +41% and adjusted EBITDA margin about -27% (Rs 144 Cr loss incl. Rs 174 Cr InstaHelp) = about 14	Certain (arithmetic)
Rule of 40 (ex-InstaHelp)	**Pass, flattering**	About +5.6% margin = about 47. But InstaHelp is a real cost management chose to take.	Likely
Loss trend	**Fail**	Net loss Rs 182.5 Cr vs Rs 59.3 Cr a year ago; Rs 92.1 Cr last quarter	Certain
Momentum	**Borderline**	Revenue Rs 537.3 Cr vs Rs 528.3 Cr prior quarter (nearly flat). Mgmt guides combined Q2+Q3 native NTV growth of 50-55%.	Likely
Recession test	**Cannot run**	Listed in 2025; no 2022 or COVID record to test	Certain
Dilution	**Fail**	Board approved raising up to Rs 2,500 Cr (about 12% of market cap)	Likely
Gate 3: valuation	**Fail**	Price-to-sales about 14.5; consensus 'Sell', average target about Rs 134 vs about Rs 143 price after results	Likely

Street test (three reasons to own it)

A loved, observable product; orders up 103% YoY to 15.1 million; a profitable core. The fourth item breaks it: a Rs 2,500 Cr capital raise to fund a loss-making side bet.

Sell and watch triggers for next quarter

InstaHelp losses shrinking; Q3 native NTV growth in line with the guided 50-55%; size and terms of the dilution; any further widening of the net loss.

What this sample shows

The skill fetches fresh data, applies the book's gates in order, tags each call with a confidence level, and ends with a street test and sell triggers. Its verdicts are a rules-based screen, not predictions. Source data (Oct 2026): company Q2 FY27 filing summaries via Inc42, Kotak Neo, Free Press Journal; consensus via StockAnalysis. Verify against exchange filings.

Rules paraphrased from Jim Cramer, How to Make Money in Any Market (Simon & Schuster, 2025). India adaptations in the skill are the author's own mapping. Author: Swayam Kondapalli.
